

INTEGRATED FASHION SHIPPING SOLUTIONS, EFFICIENT WAREHOUSE OPERATION

Avion offers end-to-end integrated shipping services for fashion products and garments.

Avion Australia provides efficient transportation solutions to meet the global sourcing needs of the fashion industry. With a vast international network in key textile and clothing industry hubs across Europe, Asia, the United States and Australia, Avion provides multimodal freight solutions.

We seamlessly connect various shipping methods by air, sea and land, enabling us to meet the tightest delivery deadlines demanded by manufacturers and retailers.

At Avion Australia, we handle the entire Fashion Supply Chain, managing the process from factories to direct delivery to shops. Our advanced Order Management and IT Integration systems ensure transparent and efficient tracking of international shipments.

Our dedicated staff specialises in the transportation of fabrics, yarns, leathers, semi-finished products, luxury items, and fashion accessories. We protect textile and fashion items using containers designed to shield them from dust, damage, and humidity, such as our Garments On Hangers (GOH) container system.

For customers in need of efficient distribution strategies, we offer cost effective cross-docking services that minimise handling. Whether you're in the Haute Couture, footwear, or apparel industry, Avion Australia guarantees timely and global international shipping. Leverage our extensive network for air, sea, and land transportation and trust us to handle your products from worldwide origins.

OUR SOLUTIONS:

Fashion Warehouse Logistics

- 5000 m2 for product/pick & pack, 500 m2 for visual merchandise
- 3PL: new products, wholesale division/replenishment for stores of latest season
- Reverse logistics: returns/unsold/aged stock/samples

DIGITAL TOOLS, LOGISTICS VISIBILITY 24/7

Digital services for International shipments optimises your Supply Chain Management

With our advanced technology and global Avion network, we provide efficient supply chain management. Through EDI and API integration, we offer Purchase Order (PO) management, End-to-End Visibility, and Global Tracking for shipments.

Our digitalisation and monitoring capabilities cover every phase of shipment, from production to final delivery, enabling international customers to track their shipments and plan warehouse stock management in advance. This results in reduced transport costs and optimised supply chain management.

Our innovative software and dedicated Warehouse Management System (WMS) monitors all warehouse operations, from goods entry to processing and delivery (B2B/B2C). The integration with other management systems provides complete visibility of handling and stock management for each item or SKU.

Avion's WMS seamlessly integrates with our Transport Management System (TMS) and other e-service platforms, transforming orders into shipments, streamlining operations, and significantly reducing errors compared to manual data entry.

We offer real-time information for full transparency and visibility of your shipment at all times.

OUR SOLUTIONS:

- Full 24/7 online visibility of your supply chain
- Track and Trace, real-time tracking of shipment
- Utilize the full potential of your data
- Customer service by logistics experts
- Potential savings & increased efficiency
- Private, secure log in for our customers
